

Antibacterial, Antivirus, deodorize
Nano Silver (Ag) Aqueous Solution

GS Nano Silver

Based on our metal nano colloids synthesis technology, we have made nano silver (Ag) dispersed aqueous solution. With our company test result, we have confirmed that GS Nano Silver have antibacterial effect. (Third party organization test result is ongoing).

Concentration of silver is 25 ppm.
Average particle size is 10-20nm.

Silver is known to possess antibacterial effect since ancient Greek, Roman time. It is said that during pioneer era in American history, people put silver coin into milk in order to kill bacteria. Recently, there are many products utilizing antibacterial, antiviral effect of silver ion, silver nano particles in the markets. Those are nano silver contained textile, washing machine, dye, paint, resin, polymer, sink, ceramic, deodorant, disinfectant, kitchen goods, cosmetic, products for infant etc... In addition, application expands to medical field including coating for transplant tissue, treatment for scratch and burn, disinfectant for medical devices etc...

【Feature】

1. Antibacterial, antiviral, deodorize effect.
2. This product is the nano sized silver (Ag) particles dispersed in the water.
3. The silver concentration of this products is 25 ppm.

【Content】

Minimum order quantity 100 g,

Please consult with us regarding request quantity.

【Application】

1. Antibacterial water, antibacterial water spray (one can use it intact product)
2. Hygienic mask by spraying this product.
3. Antibacterial, antiviral, deodorize effect for cloth, shoes, boots etc...
4. Eliminate the odor of sweat on the body.
5. Eliminate the odor of cloth.
6. Utilization to cosmetic products.
7. Replacement of alcohol (ethanol) and chlorine based antibacterial, antiviral products who dislike those products smell.

【Notes】

Store in a cool, dark place. Prevent from freezing and direct sunlight.

Make sure to wash off immediately when products gets in the mouth, eye, nose etc...
